

Yet another dead at work: we request an urgent meeting with Minister Poletti

16 April 2018

The umpteenth tragedy at work has taken place in the morning of today. A 62-year-old worker, in Porto Nogaro, was overwhelmed by a mechanical vehicle and died due to the serious traumas reported.

From the first reconstructions that are coming in a fragmentary way it would seem that the worker, employee of a shipping agency, was carrying out operations of control of the goods within the scope of his duties.

The port operations, apparently related to the movement of sheet metal, were instead carried out with a mechanical means by another worker when, for reasons still to be clarified by the bodies in charge, the victim was invested.

The National Secretariats of Filt-Fit and Uiltrasporti express their condolences and solidarity towards the family members and colleagues of the deceased worker and at the same time, also considering the long chain of fatal accidents that characterized this period, will ask the Minister of Labor Giuliano Poletti an urgent meeting so that we can move from words to deeds in terms of safety at work, in particular as regards the harmonization of port regulations with the single text and the risks of interference in the port.

The OO.SS. writers, with the present, also proclaim the national strike of 1 hour at the end of each work shift for the day of Wednesday, April 18, 2018.

The details and methods of carrying out the strike will be communicated by the Territorial / Provincial structures to the respective Associations / Companies of reference in compliance with the laws in force and / or contractual provisions for the respective sectors of belonging.
